Operating netback (\$/boe)	59.21	61.11	68.15	67.70	69.60	68.19	60.26	68.90

<sup>(1)</sup> The operating netback includes results from Upstream Exploration and Production and excludes results from Upstream Infrastructure and Marketing. Operating netback is a non-GAAP measure. Refer to section 6.

<sup>(2)</sup> Includes associated co-products converted to boe and mcf.

<sup>(</sup>d) Operating costs exclude accretion, which is included in administrative expenses and other.

(d) Includes offshore transportation costs shown separately from price received. During the first quarter of 2016, the Company reclassified Oil Sands transportation costs to net against price received. Prior periods have not been restated.

(e) Includes sulphur sales revenues/royalties.

(f) All was Confort All suppose reported groups to be an administrative expenses and other.

<sup>(6)</sup> Alberta Gas Cost Allowance reported exclusively as gas royalties.

### 5. Cautionary Note Required by National Instrument 51-101

The Company uses the term barrels of oil equivalent ("boe"), which is consistent with other oil and gas producers' disclosures, and is calculated on an energy equivalence basis applicable at the burner tip whereby one barrel of crude oil is equivalent to six thousand cubic feet of natural gas. The term boe is used to express the sum of the total company products in one unit that can be used for comparisons. Readers are cautioned that the term boe may be misleading, particularly if used in isolation. This measure is used for consistency with other oil and gas companies and does not represent value equivalency at the wellhead.

<sup>(2)</sup> Based on total throughput.

<sup>(3)</sup> Average number of fuel outlets for period indicated.

<sup>(4)</sup> BP-Husky Toledo Refinery throughput was revised in the first quarter of 2016 to reflect total throughput. Prior periods reflected crude throughput only and have been restated to conform with current presentation.

<sup>(5)</sup> Included in refinery inventory is feedstock and refined products.

#### 6. Non-GAAP Measures

Husky uses measurements primarily based on IFRS and also on secondary non-GAAP measurements. The non-GAAP measurements included in this Interim Supplemental Information are: debt to capital employed, cash flow from operations and operating netback. None of these measurements are used to enhance the Company's reported financial performance or position. These are useful complementary measurements in assessing Husky's financial performance, efficiency and liquidity. With the exception of cash flow from operations, there are no comparable measures in accordance with IFRS. The non-GAAP measurements do not have a standardized meaning prescribed by IFRS and therefore are unlikely to be comparable to similar measures presented by other users. They are common in the reports of other companies but may differ by definition and application.

Debt to capital employed is calculated as long-term debt, long-term debt due within one year and short-term debt divided by capital employed. Capital employed is equal to long-term debt, long-term debt due within one year, short-term debt and shareholders equity. Management believes this measurement assists management and investors in evaluating the Company's financial strength.

Operating netback is a common non-GAAP metric used in the oil and gas industry. Management believes this measurement assists it and investors to evaluate the specific operating performance by product at the oil and gas lease level. The operating netback was determined as realized price less royalties, operating costs and transportation on a per unit basis.

This Interim Supplemental Information contains the term "cash flow from operations," which should not be considered an alternative to, or more meaningful than "cash flow – operating activities" as determined in accordance with IFRS, as an indicator of Husky's financial performance. Cash flow from operations is presented in Husky's financial reports to assist management and investors in analyzing operating performance by business in the stated period. Cash flow from operations equals net earnings (loss) plus items not affecting cash which include accretion, depletion, depreciation, amortization and impairment, inventory write-downs to net realizable value, exploration and evaluation expenses, deferred income taxes (recoveries), foreign exchange (gain) loss, stock-based compensation, loss (gain) on sale of property, plant, and equipment, unrealized mark to market gains and losses, and other non-cash items.

The following table shows the reconciliation of cash flow – operating activities to cash flow from operations and the related per share amounts for the periods noted:

		Three months ende	Three months ended June 30,		
(\$ millions)		2016	2015	2016	2015
GAAP	Net earnings (loss)	(196)	120	(654)	311
	Items not affecting cash:				
	Accretion	33	31	67	61
	Depletion, depreciation, amortization and impairment	697	905	1,419	1,769
	Exploration and evaluation expenses	30	6	30	6
	Deferred income taxes	(108)	79	(115)	(180)
	Foreign exchange	12	(7)	13	21
	Stock-based compensation	8	(4)	25	(14)
	Loss (gain) on sale of assets	96	(2)	98	6
	Unrealized mark to market	(83)	79	40	45
	Other	(1)	(30)	(1)	(10)
Non-GAAP	Cash flow from operations	488	1,177	922	2,015
	Cash flow from operations – basic	0.49	1.20	0.92	2.05
	Cash flow from operations – diluted	0.49	1.20	0.92	2.05
